505A Protractor

Measure the angle

Set the saw to the angle that the Red Arrow points to on the Red Scale

Cut the pieces with the left and right angle

Perfect mitre every time!

Perfect mitre joints - every time!

Direct reading - no calculation required!

Durable aluminium construction!

The Starrett ProSite® Protractor takes error-prone calculations out of the process of mitre cuts. Simply set your saw to the angle that you read. Upside down or backwards, the reading is always correct.

This easy-to-use tool has two scales. The red scale and arrow show the angle for a mitre joint, while the black arrows and scale provide the angle to fit a single work piece to an angle.

The ProSite® Protractor saves time and reduces waste. It's ideal for carpenters, plumbers and all building trades that require the measuring and transferring of angles. It's also invaluable for home use.

PRO SITE®
SERIES

ProSite® Series tools are packed with the features most valued by professional tradesmen and built with a level of durability that exceeds even Starrett's legendary standards.

If you want the very best tools available, look for Starrett ProSite®.
