

### Bi Metal Reciprocating Saw Blades

A brand new range from Starrett, our bi metal reciprocating saw blades will slice through wood, metal, plastic, ceramics, fibreglass and other abrasive materials quickly and efficiently. Standard blades are available in a straight, tapered or scroll cut format, the range of tooth pitches ensures that the blades will cut everything from the thinnest sheet steel up to heavy duty steel sections and thick wooden beams.

Special purpose bi metal saws include a blade with a v tooth form for plaster cutting and tungsten carbide grit blades for PVC, ceramics, and other abrasive materials.

**King Cut**, the thicker blade, is specifically designed for heavy-duty demolition, emergency extrication and other demanding applications. Having teeth with a super aggressive pitch set, this blade is designed to rip through just about anything.
